Art Unit: 3662

1. Claim 2 is allowable over the prior art of record in that none of the prior art of record either taken alone or taken in any possible combination would anticipate or would tend to render obvious Applicants' claimed apparatus as set forth in independent claim 2 that is particularly characterized at least by the claimed "semiconductor bridge ..."; "diverter body ..."; and "propellant beneath the prime ..." as claimed in claim 2 taken together and taken in the overall context of claim 2.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,367,735. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between the two claims is suggested by the patent.

Claim 1 of United States Patent 6,367,735 is word-for-word identical with claim 1 of the instant application except for the use of the word "flying" before the

Art Unit: 3662

word "projectile" on line 11 of claim 1 of the instant application and except for the insertion of the phrase "and the prime define a gap" on line 8 of claim 1 of the instant application. Since a "projectile" by definition flies, the presence of the word "flying" in claim 1 of the instant application as compared to claim 1 of the patent is not a true difference. As for the phrase added on line 8 of claim 1 of the instant application, this presence of a gap is suggested as being present in the prior art by column 2, lines 1-7 of United States Patent 6,367,735 in that that passage recognizes that if there is not a gap between the bridge and the prime, then higher voltages must be used that if the bridge and prime are in direct contact. It would have been obvious to one of ordinary skill-in-the-art to use the old and well-known gap suggested at column 2, lines 1-7 of United States Patent 6,367,735 in claim 1 of the instant application so that greater energies would be necessary for ignition, thereby lessening the possibility of an accidental ignition due to induction or due to leakage in the circuit.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art that has not been applied above is of interest in that it was previously cited in applied United States Patent 6,367,735.
